Online Data Backup

Jubson is glad to introduce online Data Backup as a new service for 2009.

Data loss is serious, and having a system failure can be catastrophic for your business, that is why Jubson is introducing online data backup.

It is ideal for businesses who value the security of having their data replicated without implementing a more costly solution. With online data backup, you transfer your data via the internet to Jubson. So if disaster strikes, we have a copy of all your priceless data.

“80% of businesses that suffer a major data loss or failure for more than 24 hours close within a year.”
Source: Gartner

Benefits:

- No costly hardware
- Fully automated
- Secure
- Reliable
- Server / Workstation backup
- Backup mobile workstations
- Data encrypted before sending
- Offsite for added security
- Quick recovery times
- Data available on CD
- Recover data online
- Ring 0800 043 9612

The transfer process happens overnight, is secure and fully automated, so you don't have to worry about a thing!

An ideal solution for small and medium sized organisations, who want to backup offsite without any hassle.
